

OnX Cloud Assessments

What Cloud Assessments Do for You

- > Enable cloud readiness
- > Determine cloud requirements
- > Analyze project pricing and total cost of ownership

Clearing Your Path to the Cloud

Migrating data and workflows to the cloud is supposed to simplify your life. After all, it's somebody else's job to worry about a whole raft of hardware and software concerns, right?

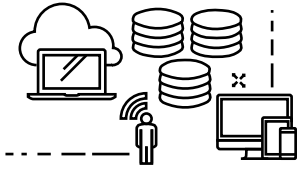

But it's not so simple if you don't know where to start.

Before you embrace the cloud, you need a partner with deep cloud expertise to look at your IT environment and give you a clear idea of the best way to go. That's the idea behind OnX Cloud Assessments: Our cloud experts spend two weeks alongside your IT people, studying your workloads and figuring out what you really need (and, just as importantly, what you don't need).

Our Cloud Assessments are like an "easy button" to point you in the best direction for your cloud journey. We'll help you with things like:

- > Getting off to a simple start and keeping complexities to a minimum
- > Defining your approach with a straightforward, step-by-step guide
- > Working out the cost and pricing models that best fit your business

Ultimately, we give you the tools you need to make savvy decisions about moving into the cloud.

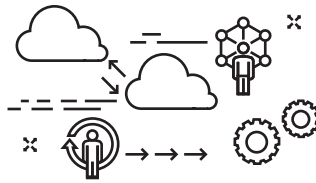

3 Steps to Using the Cloud Sooner

1. Document your workloads. Our Cloud Assessments:
 - > Measure your current workloads
 - > Show how to optimize workloads in the cloud
 - > Point to efficiencies that lower costs
2. We recommend a migration approach that
 - > Understands network flow between workloads
 - > Maps business applications
 - > Determines ideal candidates for cloud
3. We present our results in a:
 - > Review workshop
 - > Presentation to business sponsor
 - > Written report

Get Started Easily

- > Leverage cloud benefits sooner
- > Identify cloud-ready workloads
- > Scope workloads that need upgrading

What You Get in an OnX Cloud Assessment

It's everything you need to reach the cloud, including:

- > A detailed, phased approach to migration
- > Estimated moving costs and a model that fits your company
- > A better understanding of your environment and where apps need to be modernized
- > A two-week engagement delivered by OnX Cloud experts
- > An executive-level presentation to help with business justification
- > A detailed report with cost models, workload analysis and mapping
- > High value for low cost

Pick Your Pricing Model

- > Choose from three costing-optimization models
- > Get TCO details for planning
- > Detail costing and usage requirements per workload

Why OnX?

OnX Enterprise Solutions is a leading provider of premium technology services to large companies around the world. Our vast experience managing, building and configuring data centers gives us a rare insight into the complexities of a cloud environment.

OnX Cloud Assessments tap our track record working with some of the biggest names in technology, including Oracle, HP Enterprise and Cisco Systems. Our highly certified experts look at your business closely and help you find the right cloud solution for your company and your customers.
