---

## The OnX Edge in the Cloud

- > Decades of data center expertise
  - > Custom cloud solutions and managed services
  - > Adaptable to multi-technology environments
  - > Full portfolio of cloud and data center services
- 

## Accelerate Your Cloud Journey

You already know how important cloud technologies can be for your organization. With the right expertise, implementing cloud technologies can improve availability, performance and scalability of your critical infrastructure and applications. The benefits of outsourcing your data center infrastructure, management and configuration to a seasoned third-party cloud provider are clear — especially if you want to get out of the data center business and keep your IT people focused on the initiatives that will strengthen your business.

But what's the best cloud configuration for your business? What's the fastest way to move your IT workloads into the cloud? How much money can the cloud save you? How do you get executive buy-in? Every question about the cloud has dozens of answers. Getting the right ones depends on your business needs — and the expertise of your cloud provider.

At OnX, we know data centers. We've built them, configured them and managed them for clients around the world for three decades. That gives us a unique insight on what works in the cloud, and what doesn't. Our Cloud Services give you direct access to our full spectrum of data center expertise:

- > Public, private and hybrid cloud management
- > Well-defined methodology for tailoring the cloud to your unique needs
- > End-to-end infrastructure management up to the application layer
- > Simplified cloud strategy and architecture

## Proven Cloud Experience

- > Our track record includes private, hybrid and public clouds
- > Strategic manufacturer partnerships give us an in-depth understanding of multi-technology environments
- > OnDemand Residency Services provide technical experts who can augment your staff with hard-to-find cloud skills

## Defined Methodology

- > We tailor cloud services to business goals and produce consistent, predictable outcomes
- > Proven service delivery methodology reduces risk
- > Validated designs and architectures ensure performance

## Infrastructure Management

- > We can modernize apps and create them in the cloud
- > Our Managed Services team can manage your cloud all the way to the application layer

## Simplify Your Cloud Journey

Let OnX Cloud Services help you:

- > Identify optimal architecture
- > Determine ideal candidates for cloud migration
- > Decide on public, private or hybrid cloud
- > Shift the burden of patch management and 24/7 support

## OnX Cloud Services Include

- > Assessment and strategy development
- > System architecture
- > Proof of concepts
- > Automation and orchestration implementation
- > Cloud integration/migration including business apps
- > Managed cloud and hosting
- > Application migration and management
- > Cloud Training
- > OpenStack Services

## Why OnX?

OnX Enterprise Solutions is a leading provider of premium technology services to large companies around the world. Our vast experience managing, building and configuring data centers gives us a rare insight into the complexities of a cloud environment.

OnX Cloud Services tap our track record working with some of the biggest names in technology, including Oracle, HP Enterprise and Cisco Systems. Our highly certified experts look at your business closely and help you find the right cloud solution for your company and your customers.
