

The OnX and Cisco Difference

OnX has partnered with Cisco and Splunk to create a high-quality, bundled solution for Security Intelligence that will accelerate the deployment of our clients' enterprise security initiatives while reducing the risks associated with the project.

Team up with a Cisco Gold Partner and a True Data Center Solutions Provider

OnX Next-Gen Data Center & Hybrid Cloud Solutions

Unlike other Cisco partners who have traditionally grown up in the Cisco worlds of route/switch and IP telephony, OnX has an extensive track record of helping enterprises tap the massive potential of next-gen data center and hybrid cloud solutions. We have the expertise to enable our clients to build virtualized, agile, highly available and scalable IT platforms to support their business. Leveraging Converged Infrastructure, tools for Orchestration and Automation, and emerging solutions such as SDN, SDDC and OpenStack, we deliver solutions that are open, secure, automated and application relevant. OnX combines our expertise with Cisco UCS, Nexus, and ACI with a complementary ecosystem that consists of key partners like Intel, Oracle, Red Hat, VMware, SAP, Nimble, EMC, Hitachi Vantara and others.

OnX Information Management & Analytics Solutions

Information is a critical success factor for our clients. In today's business environment, being able to manage and exploit data to drive value and identify new revenue opportunities is a competitive advantage. OnX has skills in database, big data, analytics, enterprise content management and portal development to turn information into well-informed decisions. Our partner ecosystem in this space includes Splunk, Oracle, HortonWorks, MapR, Cloudera and StackIQ.

Why OnX?

Our knowledgeable, certified, highly skilled team of 1500+ professionals, built exclusively to serve our enterprise clients, sets us apart and has earned the trust of enterprise companies across the U.S. and Canada. We create a path for implementing the right Cisco solutions to achieve your goals. And our OnX OnDemand Residency Services team can augment your in-house capabilities by bringing highly skilled and pre-qualified IT resources onsite.
