

OnX Brocade Appliance

The OnX Brocade Appliance enables rapid, custom deployment of the Brocade Session Director, transforming service provider networks into agile and scalable platforms and that deliver rich customer experiences.

A Rapid Response Plan for Optimizing Network Traffic

Service providers need next generation network tools to maximize productivity and ROI from their existing investments as data volume grows exponentially. That's why OnX designed and built our new OnX Brocade Appliance — a turnkey network visibility solution enabling rapid, custom deployment of the Brocade Session Director on commodity servers, helping service providers transform their networks into agile and scalable platforms that deliver rich customer experiences.

Brocade's innovative Session Director software works in tandem with its world-class network packet brokers (NPBs), granting service providers subscriber, session and network-aware traffic optimizations that are economical and infinitely scalable.

Service providers who partner with OnX to deploy the OnX Brocade Appliance get:

- > The full potential of the Brocade Session Director for optimizing network traffic, maximizing the ROI of existing tool investments, and elevating customer service
- > Custom configuration in the OnX Integration Center and onsite deployment services to accelerate time-to-value of your investments
- > Reduced risk and project timelines with a tested configuration, proven implementation methodology, and experienced engineers

Accelerate Time-to-Value with the OnX Brocade Appliance

- > **Turnkey Solution:** Integration of the Brocade Session Director on commodity servers, deployed in tandem with Brocade network packet brokers in a single solution
- > **OnX Integration Center:** The OnX Brocade Appliance is built to order in our 12,000 square foot integration center for custom integration and staging
- > **Deployment Expertise:** We install and deploy your OnX Brocade Appliance onsite so your team can stay focused on tasks that drive your critical business initiatives

Stay Focused with Ongoing Management Services

Remote Monitoring & Management: Offload the day-to-day management of your OnX Brocade Appliance with our Remote Monitoring and Management services, providing proactive 24x7 support with industry leading monitoring and alerting tools.

Backup-as-a-Service: As data volumes grow exponentially, so does the need to fortify a solid backup and recovery solution. Partnering with OnX gives you the resources to restore your IT environment, recover your data and resume operations with data backup solutions designed to fit your business and budget.

Why OnX?

OnX is a leading technology solutions integrator for forward-thinking businesses around the world. Our vast experience helping global communications service providers assess, design, build and manage data center solutions gives us rare insight to successfully deliver software-defined session intelligence for scalable, on-demand network visibility.

Strategic partnerships with today's most prominent technology companies, including our Elite Partnership status with Brocade, ensure we have an in-depth understanding of multi-technology environments and make us one of the premier enterprise technology integrators in North America.
