Setting Your Database Up to Perform for You

Optimize Your Critical Database Technology with OnX Database Solutions

Database management raises almost endless questions. Do you have multiple versions of database software scattered across your company? Would you like to update to the latest release of your database software for better performance and security? Are you stuck with old equipment nearing its end of life or support? Do you want to make it harder for hackers to get their hands on your most vital data? Are you planning to dive into Big Data and the Internet of Things?

OnX Database Solutions can help you with the answers to these questions. We have a proven track record and expertise in architecting, building, and operating enterprise database environments.

Put the OnX advantage to work on your databases

At OnX, we see lots of companies whose databases have become a tangle of software versions and security patches. It's so hard to keep up that performance degrades, hardware starts to wear out, and networks become more vulnerable to intruders.

These forces put companies in a pinch: How can they cure their database woes while still tending to business? It can feel like trying to swap out the engines of a 747 while the plane is still in the air.

That's why companies to turn to us for critical Database Solutions. We do things like:

> Upgrade and migrate various versions of databases to the desired appropriate, stable and consistent release level across multiple apps and platforms.
> Improve database performance, availability, reliability and security.
> Provide workshops to show you how to get the best possible performance from your databases.
> Establish high-performance backup and recovery systems.

Work with an Oracle Platinum Partner

OnX can help you every step of the way when working with Oracle, whose software enables a vast spectrum of enterprise-level IT functions around the globe. Our in-house expertise includes an Oracle ACE Director, which is the highest level of recognition for Oracle technology evangelism (there are only about 135 ACE Directors globally, and only about 45 in the U.S.). OnX is an Oracle Platinum Partner, the highest partner level for infrastructure technology solution resellers worldwide. As a Platinum Partner, we have the deep expertise and strategic relationship with Oracle required to upgrade, tune, secure and back up Oracle databases.

Why OnX?

Your IT people need to increase your company's profitability and insure your customers' satisfaction; they don't need to be sweating every last detail of your database structure. That's what we do. And we do it with a proven success and methodology delivering over 1,100 projects annually.

Our knowledgeable, certified, and highly skilled professional services team - built exclusively to serve our enterprise clients - sets us apart and has earned the trust of enterprise companies across the U.S. and Canada. Our team of 600+ professionals creates a path for implementing the right database technologies to achieve your goals.

And our OnX OnDemand Residency Services team can augment your in-house capabilities by bringing highly skilled IT staff onsite to complete special projects or to help manage your everyday operational needs.
