

# OnX Managed Services

---

OnX services like managed cloud, remote data center monitoring and backup/disaster recovery give companies the breathing room they need to grow and prosper without feeling shackled by IT concerns.

---

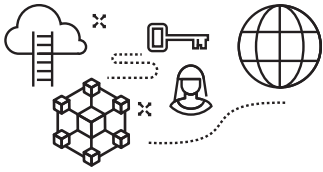

## More Room to Grow, Less Downtime Risk

Enterprises that need to deliver new products, services and applications to market quickly and cost effectively understand the value of a strong managed services partner to elevate their critical IT capabilities. OnX helps companies throughout North America stay focused on their key business objectives while we sweat the details of managing back-end IT infrastructure.

OnX's suite of cloud and managed services can help you with:

- > Traditional dedicated private hosting and self-serve or fully managed IaaS cloud solutions
- > Remote monitoring, management, backup and recovery of your data center
- > Network and device support
- > Hosted email and collaboration tools empowering your staff to share critical information effectively and securely

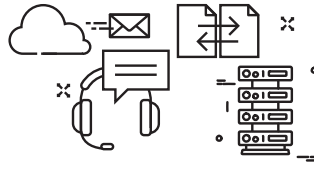

OnX brings decades of enterprise IT experience and hundreds of highly certified technology experts to the managed services arena. Services like managed cloud, remote data center monitoring and backup/disaster recovery give companies the breathing room they need to grow and prosper without feeling shackled by IT concerns.

## Cloud Services and Managed Hosting

Our flexible suite of managed services delivers:

- > Hybrid solutions for private and IaaS cloud
- > Faster time to market
- > Lower infrastructure capital requirements
- > Access to certified support, with guaranteed SLA
- > Turnkey managed hosting solutions, delivered in a multitenant cloud or dedicated private hosting environment
- > Better performance and availability of mission-critical applications, improving your ability to meet strict security and compliance requirements
- > More freedom to focus on your core business growth strategies
- > Extra capacity for seasonal or larger-than-usual computing requirements
- > High availability for mission-critical applications

## Remote Monitoring and Management

- > 24x7 remote service and support
- > Eliminate downtime, guarantee availability
- > Use federation to move workloads to multiple environments
- > Hand-off system administration, security patch management, and server and infrastructure management

## Backup and Recovery

- > Improve security and compliance
- > Protect vital business data
- > Recover quickly from natural disasters or hacking attacks
- > Outsource production, create fail-over or dual-site solutions

## Communication and collaboration

- > Enterprise class communication technologies
- > Predictable cost per user
- > Cloud-hosted email
- > Social and mobile collaboration
- > SharePoint-as-a-Service
- > Document and email management

## Why OnX?

OnX has highly certified IT professionals with in-depth expertise across a broad spectrum of enterprise IT technologies. Our technical acumen, decades-long track record and partnerships with industry giants like Cisco, HPE and Oracle make us one of the premier enterprise technology integrators in North America.

We bring all these skills to bear on our managed services and cloud offerings. Our data centers provide high availability and flexibility for a broad array of cloud services, while our in-depth experience in security, compliance, data backup and disaster recovery reduce the risk of crippling downtime.
