

# Fully Managed Microsoft Azure Data Backup-as-a-Service

---

Reliable, secure backup and recovery services are pivotal to protecting your business, brand and success from accidents, downtime, cyber attacks and many more threats. OnX can manage all these processes for you safely and securely in the Microsoft Azure public cloud.

---

## Let OnX and Azure Handle Crucial Backup Tasks

Microsoft's Azure public cloud is one of the most trusted places to store enterprise-level data backups. Azure is secure, encrypted and extremely reliable — what's not to like? Well, maybe you'd like to hand off your backup-and-restore duties to an expert and devote all your IT people's attention to improving your core business.

OnX can make that happen with our fully managed data backup, replication and restoration service based in the Azure public cloud. It works like this:

- > Data is encrypted and backed up from your data center to the Azure cloud.
- > Monitoring and management confirm that the daily backup is successful.
- > When alerted to an issue, OnX Network Operations Staff identifies it and reruns the backup.
- > You can easily upgrade to a fully replicated environment for true disaster recovery and business continuity protection.

Reliable, secure backup and recovery services are pivotal to protecting your business, brand and success from accidents, downtime, cyber attacks and many more threats. Letting OnX manage these services on Azure's public cloud helps prevent backup from becoming the Achilles heel of your business.

## Fully Managed Enterprise-Class Data Backup

- > Get out of the data backup business and let OnX experts take over.
- > OnX conducts daily backups to your precise requirements on Microsoft's Azure public cloud. Our staff flags any problems that arise and remediates them quickly.
- > We operate 24x7 so you don't have to. Schedule backups as often as you require at a time that's most convenient to you.
- > If you need a restore, OnX will make it happen as soon as possible.
- > Retain your data in the cloud for as long as your business requires — up to 99 years!

## Quickly and Simply Address Your Critical Backup/Storage Needs

- > Microsoft Azure is the proven enterprise-grade public cloud solution that allows you to secure your critical data offsite and address your industry regulatory compliance standards with storage retention timelines that meet your unique requirements.
- > Tap the power of data backup solutions that are tested and proven to protect your business from compromise or loss of critical data.
- > Encryption secures your data at the source, in transit via secure connections, and at rest in the cloud.
- > Industry-leading Commvault software helps us manage your backups safely and efficiently.

## Why OnX?

OnX Managed Services is a leading provider of premium technology to large companies around the world. Our vast experience managing, building and configuring data centers gives us a rare insight into managing the complexities of enterprise-level data backup and recovery in Microsoft Azure public cloud.

OnX Managed Services tap into our three-decade track record working with some of the biggest names in technology, including Oracle, HP Enterprise and Cisco Systems. Our highly certified experts look at your business closely and help you find the right Azure backup and recovery solution to protect your business and keep your customers coming back.
